Professional Summary

Computer Science student specializing in full-stack development with experience building React and Node.js applications, REST APIs, and real-time data dashboards. Passionate about scalable backend systems, modern web architectures, and AI-powered applications.

Education

Dr. D. Y. Patil School of Science and Technology

BTech, Computer Science and Design

May 2027

Pune

Sr.No.	Qualification	Board/University	Score
1	10 th Standard	CBSE Board	74%
2	12 th Standard	State Board	78%
3	B.Tech (Pursuing) 1 st Year 2 nd Year 3 rd Year	Dr D.Y Patil School of Science and Technology	9.10 CGPA 9.45 CGPA 9.40 CGPA

Skills & Interests

- **Languages:** Java, JavaScript, Python, TypeScript
- **Frontend:** React, HTML5, Tailwind CSS, Bootstrap
- **Backend:** Node.js, Express.js, REST API's, JSP, Fast API
- **Database:** MongoDB (Mongoose), MySQL, JDBC
- **Authentication & APIs:** JWT Authentication, Role-Based Authorization, RESTful API Design
- **Tools:** Git, GitHub, feature branching, pull requests
- **Leadership & Management:** Student Council Member; Vice President of Developers Club

Experience

Full Stack Development Intern

DevAcademix — Remote

Sep 2025 – Nov 2025

- Developed and improved frontend and backend components for web applications using modern web technologies.
- Collaborated with developers to design and deploy scalable web solutions and integrate APIs.
- Contributed to UI/UX improvements, enhancing usability and overall user experience.
- Assisted in database management, testing, and hosting workflows during project development.

Projects

AI-Powered Satellite Tracking Dashboard (Sat-LM) [GitHub](#)

(React, Vite, Node.js, Express, satellite.js, Ollama, TailwindCSS)

- Designed and implemented REST APIs for satellite data retrieval, caching, and periodic updates using Express.js.
- Integrated a local LLM pipeline that grounds responses using live satellite telemetry instead of static prompts.
- Designed a responsive dashboard capable of visualizing continuously updated orbital data.

PDF RAG Chatbot [GitHub](#)

(Python, FastAPI, Sentence Transformers, ChromaDB, Ollama)

- Built a PDF-based Retrieval-Augmented Generation (RAG) chatbot for context-aware question answering.
- Implemented PDF text extraction, recursive chunking, local embeddings, and ChromaDB vector storage.
- Added JWT authentication, document management, chat history, and RAG pipeline monitoring.

Certifications

- Internal Smart India Hackathon 4th Place holder 2025
- Apna College Delta Course 2025
- Introduction to Generative AI: Google Cloud, 2025
- Microsoft Cloud Security Masterclass: Ernst & Young, Feb 2025
- Web Development Fundamentals: IBM Skills Build, Oct, 2024
